

Multi-Truck

- 500kg Capacity
- 1.7m Raised Height
- Ackerman steering
- 4m working height when used with removable access cage & outriggers
- 400mm dia puncture proof foam filled pneumatic wheels
- Optional waterproof flame retardant cover
- Custom designed accessories

Our Multi Truck was designed not only to provide a truck capable of being used on the Heli-deck to unload cargo but also as an item that was of equal use for many tasks throughout the installation when fitted with its custom designed accessories.

The Truck has a Swl of 500kgs and a manually operated hydraulic scissors action lift platform with a raised height of 1.7m.

When fitted with its removable access cage and outriggers the truck converts into a portable man access unit providing a safe working platform which enables operators to reach equipment approx. 4m high.

With its custom built pig tops fitted the truck converts into a mobile pig launcher receiver unit and with the roller top fitted it is ideal for the removal of switch gear items, batteries and can be used as a work positioned or adjustable support unit .

Heli-Deck Crane

Our Heli-Deck Crane is manufactured to offshore specification.

The unit has a Swl of 500kgs, manually operated hydraulic action with a maximum raised height of 2.56m.

The unit has 400mm dia foam filled pneumatic wheels which have all the advantages of pneumatics but are puncture proof.

Four lifting points are welded to the top members of the crane for movement between locations.

Supply includes Load Test, NDT Certification and four leg wire rope sling assembly.

Painting to Offshore Specification and Flame Retardant waterproof PVC cover.

- 500kg Capacity
- 2.56m max lift height
- 3 Position Extending Telescopic Jib
- Ackerman steering
- Folds for ease of storage
- 400mm dia puncture proof foam filled pneumatic wheels
