

Universal Single Gas Bottle Carrier

The Universal Single Gas Bottle Carrier provides a straight forward and easily operated method of transporting gas cylinders around the installation.

The design incorporates a unique quick change retaining strap system allowing the single main frame to be used with the 3 main bottle diameters: 230mm, 295mm & 375mm

The wide frame base ensures bottles are stable when positioned vertically. The rear support wheel folds up to help minimise any possible snag hazard during crane movements and drops down to allow bottles to be easily moved to the desired location.

Swl 150kg. Large 280mm dia rubber cushion wheels and 1-off 150mm dia rear swivel castor.

Supplied with load test & NDT certification, master link shackle assembly and painting to Offshore Specification.

- **150kg Capacity**
- **Supplied with 3-off Interchangeable Straps**
- **Folding rear wheel**
- **Purpose built for offshore walkways**
- **Large diameter wheels for grating**
- **Supplied with Crane Connector**
- **Full NDT & Load Test Certification**
- **Manufactured & painted to Offshore specification**

Double Gas Bottle Carrier

The Double Gas Bottle Carrier is ideal for all burning & heat treatment operations throughout the installation. The carrier can accommodate Oxygen/Propane or Oxygen/Acetylene combinations and is supplied with 3 retaining bands to allow operator choice.

The main wheels have been cleverly positioned behind the cylinders reducing the overall width to 750mm. This allows all but the most restricted walkways to be negotiated easily.

Gauges and hoses can remain connected during movement and by positioning the carrier close to the work site will eliminate excessive hose runs.

250kg capacity, complete with 2-off main 350mm dia rubber cushion wheels and 1-off 200mm dia rear swivel castor, load test and NDT certification, two-leg wire rope sling assembly and painting to Offshore Specification.

- 250kg Capacity
- Use for burning & heat treatment operations
- Purpose built for offshore walkways
- Large diameter wheels for travelling grating
- Gauges & hoses can remain connected during movement
- Supplied with 2-leg sling
- Full NDT & Load Test Certification
- Manufactured & painted to Offshore specification
