## Cylinder Lifting Trolley

Our Vertical Cylinder Lifter is designed to allow the raising and lowering of all types of gas bottles up to 380mm dia and a max weight of 250kgs.

It's compact size allows entry into fire cabinets, accumulator bottle racks etc and provides a method of lifting gas cylinders into and out of position with no manual handling effort.

The operator simply places the gas cylinder on to the base plate and lifts the bottle by winding the manually operated jack. Various heights of lift are available.

All units are supplied with load test and NDT certification, stainless steel chain retention system and painting to offshore specification top coat white.

- 250kg Swl
- Designed to carry a max cyl size 380mm diameter
- Simple manual operation
- Retaining chain system for added security
- Full NDT & Load Test Certification
- Manufactured & painted to Offshore specification
