

## **Gas Bottle Mini Quads**

The Safelift Mini Quads are ideal for the general movement and storage of gas bottle cylinders throughout the offshore installation or onshore terminal. Their compact size, open sides and drop down ramp allow bottles to be easily loaded without having to physically lift each cylinder.

The units are available in a choice of three sizes.

Size 1 Safelift Mini-Quad, 1.35te Swl, 860mm wide x 820mm deep x 2100mm high

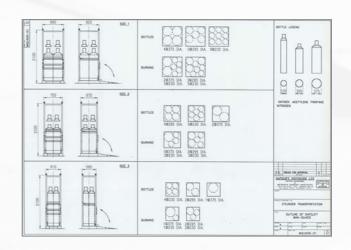

<u>Size 2</u> Safelift Mini-Quad, 0.9te Swl, 750mm wide x 670mm deep x 2100mm high

<u>Size 3</u> Safelift Mini-Quad, 0.6te Swl, 610mm wide x 565mm deep x 2100mm high

All units are c/w non-slip drop down ramp door, 2off quick release ratchet straps for holding bottles secure, Load Test and NDT certification, a four leg wire rope sling assembly and Painting to Offshore specification, top coat white.
