

# SAFELIFT 4-WHEEL LIFTABLE TRUCKS

## Introduction

**\* This model has a SWL of 2500kg for lifting and a SWL of 4000kg for deck use**

Originally designed to provide a quick and safe method of transporting scaffold clips around offshore installations, this truck has gone on to establish itself as a general load mover.

Versatility is assured, common tasks are transporting scaffold clips or multiple items of loose rigging equipment direct to the job location.

The foam filled wheels provide all the characteristics of pneumatic but without the risk of puncture. This ensures the truck can be easily moved over nets, cable tracks, ramps, etc.

All trucks come c/w 4-off certified lifting padeyes, 1-off positioned at each corner of the truck for lifting the fully loaded truck around the installation and are supplied with 4-leg wire rope sling assembly BS EN13414 pt1, individual Load Test and NDT certification and painting to Offshore specification, top coat white.

**Options:**  
Parking brake  
Steering Stop

Model	Capacity (SWL)	Length	Width	Height
SOLFWLT750	0.75te	800mm	500mm	830mm
SOLFWLT1T	1te	1000mm	500mm	880mm
SOLFWLT2T	2te	1500mm	800mm	1050mm
SOLCFWLT4T	2.5te*	1500mm	800mm	980mm

## Features

- Designed for the rigors of the Oil & Gas Industry
- Heavy duty construction
- Puncture proof wheels
- 4-off certified lifting points for fully loaded truck
- Individual NDT & Load Test Certification
- Manufactured & painted to offshore specification
